

## Polyair Coil Spring Airbags

Polyair Red Series Bag Kits are designed to fit inside the coil of a coil sprung vehicle to assist the spring in supporting whatever load is placed in/on the vehicle (upto the manufacturer's recommended gross vehicle weight rating).

They will help in eliminating “bottoming out” and improve ride, handling and stability.

The air adjustability allows you to tune the ride you want, whether you're load carrying, towing or just driving lightly!

Made with tough, long-lasting, moulded polyurethane.

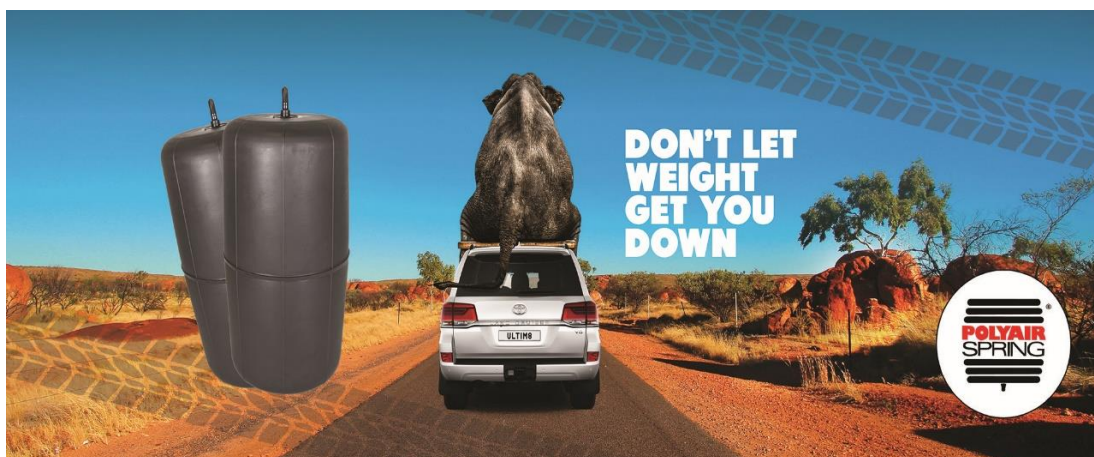

Polyair Bags are the proven way to improve the ride and handling in all coil sprung vehicles with Heavy Loads or Towing Heavy Trailers and Vans.

They will even improve handling when empty by reducing rear end body roll in your vehicle including:

- 4WD's
- SUV's
- Utes & Vans

### Features and benefits of the Polyair RED Series:

- Increase load capacity by up to an Extra 300/350kg (or to OEM's GVM)
- Are easy to fit (approximately 2 hours)
- Have separate air lines for each bag
- Inflated & Deflated via schraider valves just like your tyres
- Reduce body roll, sway and bottoming out
- Feature tough polyurethane construction
- Include 1 year / 20,000KM warranty
- Include quick connecting, easy to use polymer air fittings
- Available for Standard or Raised Height 4WD applications
- Very affordable pricing

Polyair 'ULTIMATE' Black Series Bag Kits: These days we are all expecting a lot more out of our SUV's and 4WD's and as a result they are now towing and carrying more and more. Polyair

Springs have acknowledged this trend and have provided a solution with the “Polyair Ultimate Series”.

The Ultimate Series is an in-coil load assist Polyurethane Airbag System that provides even superior load levelling capabilities, (upto the manufacturer’s recommended gross vehicle weight rating or GVM Load Rating), comfort & control to suit a vast range of vehicles, loads and conditions with it’s **impressive 60psi rating**.

The Ultimate’s significant **60psi pressure rating** allows you to take on the tough loads whether you are highway touring or travelling off the beaten track.

The Polyair Ultimate Series is the most advanced Polyurethane Airbag on the market and will provide your car with a new level of load support.

They will help in eliminating “bottoming out” and improve ride, handling and stability.

The air adjustability allows you to tune the ride you want, whether you’re load carrying, towing or just driving lightly!

Made with a new Extra Tough, Long-lasting, High Density moulded polyurethane.

Polyair ULTIMATE Bags are the proven way to improve the ride and handling in all coil sprung vehicles with Very Heavy Loads or Towing Heavy Trailers and Vans in Coil Sprung Vehicles.

They will even improve handling when empty by reducing rear end body roll in your vehicle including:

- 4WD's
- SUV's
- Utes & Vans

### Features & Benefits of the Polyair 'ULTIMATE' BLACK Series:

- A super high-density polyurethane airbag system that is *the strongest of its kind* and includes a **2 Year / 40,000Km Warranty**
- Workable range from **5psi – 60psi** giving a huge amount of control in spring rate variability
- Reduces sway and body roll
- Great for towing – keeping vehicle level & safe!
- Corrects rear end sag
- Corrects headlight aim
- Lengthens the life of other suspension components such as coil springs, shock absorbers and bushes
- Improves a rough ride through its progressive spring rate

### Polyair Ultimate Kits suit the following vehicles:

Toyota Landcruiser (in standard height, 1" raised, 2" raised):

80 Series Wagon, 100 Series Wagon, 200 Series Wagon

- Nissan Patrol (in standard height or 2" raised)
